

Phoenix Behavioral Therapy Dog Shiloh

Shiloh is Shondra Smith's canine co-therapist. Both have been trained in Animal Assisted Intervention. As a former equine-assisted therapist, Shondra is able to add more creativity to her approach in an office setting. Utilizing a therapy animal has a variety of goal-oriented benefits including helping to improve the expression of emotions and feelings, boost self-esteem, increase relaxation, and lower anxiety levels.

Shondra Smith - Education

Master of Arts in Counseling
